PROFILE

Product designer and product manager for complex products with many kinds of users: banking and payments, court and government systems, business software, education and HR. I take products from the business case and requirements to tested, developer-ready design, and I run delivery: roadmaps, sprints, stakeholders and releases. I've been building products since 2022 and working remotely with teams in the US, Germany and beyond. First-class Computer Science graduate who builds working AI apps to prototype and test ideas faster. Works across the full UK and EU day and US East mornings.

EXPERIENCE

Product Designer, independent contract · Ghanaian commercial bank · under NDA — Oct 2026 – Present

Treasury management system: one platform where tellers, FX dealers, risk, settlements and finance work on the same live deal.

- Mapped the end-to-end user journey with my supervisor across 14 roles in front, middle and back office, plus a regulator portal and USSD agents. Rewrote the PRD against the bank's process map and built 16 journey maps.
- Designed the user flows and 500+ high-fidelity screens, with a clickable prototype for every role, audited against UX heuristics.
- Built a 42-component design system with WCAG AA colour, including banking parts such as quote cards, limit meters and deal steppers.

UI/UX Design Consultant · Nerdion Tech Solutions · Remote, part-time — Sep 2026 – Present

Lead designer on Loco, a business management and point-of-sale platform for small businesses in Tanzania. Responsible for about 90% of the product's design.

- Designed more than 300 high-fidelity screens across four surfaces: the owner's web dashboard, a mobile admin app, a tablet POS for cashiers and waiters, and a customer storefront for online orders.
- Designed merchant sign-up with KYC checked against Tanzania Revenue Authority records, and the daily tools: sales, stock, staff shifts and roles, invoicing, multi-branch control and five report suites.
- Designed a hotel rooms module, the Loco AI assistant, online orders with a wallet, and subscription billing with POS lockout.
- Designed the marketing site and pricing for two plans, a pre-order flow for 13 hardware devices, and extended the shared design system with POS components.

Product Analyst Consultant · MojoPay — Apr 2026 – Present

- **Product review:** review products against business and market needs, covering PRDs, existing designs, UX and UI consistency across platforms, and competitor benchmarks. Deliver evidence-based reports with prioritised findings and recommendations.
- **Requirements and roadmap:** run structured PRD reviews, tighten acceptance criteria and document missing journeys, personas and edge cases. Flag design debt, separate quick wins from structural fixes and recommend success metrics.
- **Design:** turn approved improvements into Figma wireframes, prototypes and responsive high-fidelity designs, with design system contributions and engineering handover.

UI/UX Designer · Interactive Digital · Accra — May 2025 – Present

Digital agency designing for banks, telcos and fintechs in Ghana.

- **Court case management:** role-based workspaces for nine district court roles for the Judicial Service, from cashier and registrar to bailiff and judge, with a phone version for bailiffs in the field, a design system and an accessibility spec for handoff.
- **HR portal (The Ninani Group):** six roles from employee to COO, covering two-step sign-in, multi-level leave approval, payslips, onboarding and offboarding, and an in-portal AI helper, on web, tablet and mobile.
- **MiSika:** merchant financing for MTN MoMo merchants with Adehyeman Savings & Loans, including the *171# USSD loan journey, the mobile screens and a landing page in three coded directions.
- **Stanbic Bank Ghana:** two gamified mobile campaigns, a MoMo experience survey with tips and rewards and a Valentine's Day quiz with shareable results.
- **Also:** Sway (creator–brand marketplace app with an AI assistant), the TF Financial Services website, the MTN MoMo web sign-in, Forms Capital's site structure and the Northstone e-commerce redesign.

Project Manager, Scrum Master and Product Designer · Cynteract, Germany · Remote — Dec 2024 – Present

Health-tech company. Working across time zones with a team based in Germany.

- **Delivery:** run all sprint ceremonies for a distributed team. Issue resolution time fell 40%, code review and testing standards cut production bugs 60%, and on-time delivery across 150+ tasks rose to 90%.
- **Operations:** run monthly payroll for remote team members in Ghana and Nigeria and track hours and leave. New time-tracking and leave tools made sprint planning 35% more accurate.
- **Business development:** wrote business cases for bringing Cynteract's products to Ghana. Test therapy games before release for bugs and usability.
- **Design and web:** in-product tutorials lifted engagement 45% and halved support requests. Led a website redesign that took monthly visitors from about 30 to over 1,000.

Product Designer · Silver Rock Technologies · Accra — Dec 2024 – Present

- **Ghana Talent Hub:** leading design of a national platform that matches students and graduates with employers through assessments and verified skills. Five products for talents, parents, schools, recruiters and government partners. Gamified onboarding, an AI career guide, child-safety controls, a privacy-safe national dashboard and a WCAG 2.1 AA design system built for low data and older phones.
- **AfriPlay and Glo TV:** one streaming platform in two brands across web, mobile and tablet, with search, short-form reels, live TV with a programme guide, and pay-per-view rentals.
- **Elysium Tours and EdenStreams:** researched four personas and their journeys for a Ghana tour-booking platform, and led end-to-end design of a video streaming platform. Mentor junior designers.

Software Developer and Product Designer · Volta River Authority (National Service) · Accra — Nov 2023 – Oct 2024

- Documented internal systems, prototyped in Figma, and supported PHP development and audits.

UI/UX Designer · Iota Digital Lab, USA · Remote — 2022 – 2023

- Designed the whole BlaccBook mobile app end to end: an app for finding local businesses, with map search, business pages, deals, table booking, order history and preference-based recommendations. Now live on the App Store.

INDEPENDENT WORK

Claims experience redesign · Enterprise Insurance · self-initiated case study — 2026

- Audited the Claimxpress claims journey (8 steps, 2 pop-ups, 3 contradictory promises), set six design principles, and built three proto-personas and a today-versus-redesign emotion map.
- Redesigned it as one 9-step, phone-first journey backed by 13 documented UX decisions (eligibility shown up front, instant SMS reference, save and resume, status timeline, booked inspections), plus same-week developer fixes and a design system.

AI products, designed and built · with Claude and ChatGPT, deployed on Vercel and Render — 2026

- **Signal** `signal-feedback-agent.vercel.app`: an AI agent that turns raw feedback into themes and draft tickets, with an approval queue and an audit trail (190 comments became 8 themes and 5 tickets).
- **VoiceScript** `voicescript-web.onrender.com`: transcription and meeting notes in 25 languages, including Twi, Hausa, Swahili and Yoruba, with speaker labels and text to speech.
- **ORAD** `orad-ghipss.onrender.com`: a role-based document workspace concept for GhIPSS.
